CLAIMS

1. (currently amended) A golf tee holder [comprising] consisting of: a holder base having a plurality of legs extending outwardly and horizontally from the center of said base, [at least one said legs] one leg extending fore of said base, [at least one said legs] one leg extending left side of said base, and [at least one said legs] one leg extending right side of said base, wherein said base further forms an opening in the center for snugly receiving a golf tee.
2. (original) The golf tee holder of claim 1, wherein one pair of said legs extend outwardly in opposing directions in 180 degrees orientation.
3. (original) The golf tee holder in claim 1, wherein at least one leg extends fore of said base, at least one said legs extending aft of said base, at least one said legs extending left side of said base, and at least one said legs extending right side of said base.
4. (original) The golf tee holder in claim 1, wherein the diameter of said opening size is larger than 0.8 cm.
5. (original) The golf tee holder in claim 1, wherein said holder base is formed of plastic.
6. (original) A tee holding member [comprising] consisting of: a holder base having [a plurality of] three integrally formed leg members extending outwardly and horizontally from the center of said holder base, [at least] one said leg[s] extending fore of said base, [at least] one [of] said leg[s] extending left side of said base, and [at least] one [of] said leg[s] extending right side of said base, wherein said base further forms a circular opening for receiving a tee.
7. (original) The tee holding member in claim 6, wherein each of said legs extends horizontally and outwardly from said holder base.
8. (original) The tee holding member in claim 6, wherein at least one pair of said legs extend outwardly toward opposing directions.
9. (original) The tee holding member in claim 6, wherein at least one leg extends fore of said base, at least one said legs extending aft of said base, at least one said legs extending left side of said base, and at least one said legs extending right side of said base.
10. (original) The tee holding member in claim 6, wherein two pair of said legs extend outwardly toward opposing directions respectively forming a cross shape.
